

## Landscape Construction Foreman

revi DESIGN, LLC., is looking for experienced landscape construction foreman with solid hardscape experience to work with us to take our company to the next level. You must be able to manage a job and crew to efficiently complete high quality jobs on time and within budget. If you are a responsible, self- starting individual with experience as a working project leader, you might be who we're looking for.

### Responsibilities:

- Direct, supervise, and work with field crews.
- Operate skid steers, compact excavators, tractors, power tools, and other specialized equipment.
- Communicate with client and timely relay pertinent information to management.

### Manage and conduct:

- Residential & commercial hardscape and softscape projects including natural stone and precast pavers & retaining walls, pond & fountain installations, planting, seeding, soil preparation, and erosion control material installation.
- Install decks, pergolas and other outdoor structures as needed (building experience not required but a plus).
- Ability to read plans and establish proper grades.
- Chemical and mechanical weed control.
- Native habitat restoration projects including tree and brush cutting and removal, planting, seeding, soil preparation, and erosion control material installation.
- Manage time and material record keeping.
- Maintain & repair mechanical and power equipment.
- Load trucks and expedite field crews on daily basis.
- Winter snow plowing.

### Physical Skills:

- Repeated heavy lifting in excess of 60 lbs.
- Repeated stooping, climbing, bending and reaching.

### Qualifications:

- Minimum of 3 years of experience as a landscape foreman managing and conducting residential and commercial hardscape and softscape projects.

- Minimum of 3 years of experience operating equipment including skid steers, compact excavators, tractors, chain saws, etc.
- Minimum High School diploma or GED.
- Ability to identify local ornamental and native plants.
- Valid driver's license.
